SAURABH

+91 9821048897 | saurabh200805@gmail.com | github.com/Saurabh20-05 | linkedin.com/in/saurabh-05s20

ABOUT ME

IT undergraduate focused on Software Engineering, Full-Stack Development, and Applied AI, with a strong foundation in DSA and core computer science. Skilled in building scalable solutions through analytical problem-solving, efficient coding, and modern technologies.

EDUCATION

B.Tech in Information Technology | Maharaja Agrasen Institute of Technology | 2023 - 2027 | **CGPA: 9.26**
Class XII – CBSE | Greenway Modern School | 2023 | **87.80%**
Class X – CBSE | Greenway Modern School | 2021 | **94.00%**

SKILLS

- **Programming Languages:** C++, Python, Java, C, JavaScript
- **Core Computer Science:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **Frontend:** HTML, CSS, JavaScript, React.js, Tailwind CSS, Recharts
- **Backend & APIs:** Node.js, Express.js, FastAPI, REST APIs, Flask, JWT Authentication, Axios
- **Databases & SQL:** MongoDB, MySQL, Mongoose ODM
- **Machine Learning & AI:** NumPy, Pandas, Scikit-Learn, XGBoost, TensorFlow, NLP, RAG, FAISS, PyTorch, OpenCV, Groq AI
- **Developer Tools & Platforms:** Git, GitHub, VS Code, MongoDB Atlas, Docker, Postman, Render, Vercel, Google Colab

INTERNSHIPS

July 2026 - Present | **Software Engineer Intern** | **GlobalLogic** | **Noida, India**
May 2025 - July 2025 | **Summer Research Intern** | **ISSA, DRDO** | **New Delhi, India**
Jan 2025 - Mar 2025 | **Web Developer Intern** | **Acmegrade** | **New Delhi, India**

PROJECTS

BusinessPulse – Business Analytics & Forecasting Platform | React, FastAPI, Python, MongoDB, RAG, LLMS, JWT | · **Demo**

- Developed an interactive business analytics platform for historical trends, KPI monitoring, automated business insights, ML-based forecasting with selectable prediction models, and AI-powered natural-language analytics across built-in and user-uploaded datasets.
- Engineered a custom CSV data pipeline with upload, preview, column mapping, normalization, validation, dataset isolation, data-quality checks, and GridFS storage, enabling user-specific datasets to power dynamic analytics and forecasting.
- Built an LLM-powered AI Analytics agent that routes natural-language questions across metadata, analytics, forecasting, RAG, and general tools, generating structured queries and verified responses with tables and visualizations.
- Implemented PDF-based RAG using document chunking, embeddings, and semantic retrieval, alongside Route–Service–Repository architecture with JWT-secured APIs, Pydantic validation, Swagger, Axios-based token authorization, & i18next multilingual support.

Liftsy – AI Powered Fitness Social Platform | MERN, Groq AI, JWT, REST APIs | · **Demo**

- Developed a fitness social platform with JWT authentication, workout creation and management, live workout session tracking, progress analytics, athlete discovery, and social interactions, providing a centralized platform for personalized fitness management.
- Integrated Groq AI for personalized workout generation, fitness coaching, session analysis, & progressive-overload recommendations; implemented real-time social interactions and notifications using Socket.IO with MongoDB-backed data management.
- Engineered an end-to-end training workflow with real-time set tracking, session analytics, personal-record detection, progress visualization, and interactive social features.

FitTrack – AI Fitness Tracker | Python, FastAPI, Scikit-Learn, XGBoost, FAISS, React, MongoDB, RAG | · **Demo**

- Built a full-stack AI fitness tracker platform with a microservice architecture (FastAPI + Express.js), integrating 4 ML models for weight, fat-loss, muscle-gain prediction and injury-risk classification, with modular, SOLID-based backend architecture and REST APIs.
- Developed a RAG-powered AI Coach using FAISS, Sentence Transformers & Groq LLM, grounded in a fitness knowledge base, alongside NLP-based semantic exercise recommendations and MongoDB-backed workout, nutrition, sleep, body-metrics tracking and analytics.

CERTIFICATIONS & CREDENTIALS

- Samsung Innovation Campus – Artificial Intelligence | Samsung
- AWS Academy Generative AI Foundations | AWS Academy
- AWS Knowledge: Cloud Essentials | Amazon Web Services

EXTRACURRICULARS

- Core Committee Member, PAJAV (MAIT's IT Society) and ElevatHub; contributed to technical initiatives, event coordination, and community outreach; participated in and secured wins at hackathons and technical competitions.
