ABOUT ME

An Information Technology student with strong hands-on experience in Data Structures and Algorithms, Web Development, and AI/ML. Experienced in developing end-to-end solutions, from high-performance full-stack platforms to AI-driven tools. A disciplined problem-solver committed to writing secure, scalable, and efficient code while applying analytical thinking to solve complex real-world challenges in innovative, fast-paced environments.

EDUCATION

2023 - 2027

Maharaja Agrasen Institute of Technology

Bachelor of Technology - Information Technology

CGPA - 9.22 (current aggregate)

SKILLS

- **Programming Languages:** C, C++, Python, Java
- **Frontend:** HTML, CSS, JavaScript, React
- **Backend & APIs:** Node.js, Express.js, PHP, FastAPI, REST APIs, JWT Authentication
- **Database Management Systems:** MySQL, MongoDB
- **Machine Learning & AI:** NumPy, Pandas, Scikit-Learn, TensorFlow, Keras, PyTorch, OpenCV, NLP
- **Dev Tools & Platforms:** Git, GitHub, VS Code, Render, Vercel, Railway, MongoDB Atlas, Colab, Postman, Docker
- **Soft Skills:** Team Collaboration, Effective Communication, Organizational Skills, Decision-Making

INTERNSHIPS

January 2025 - March 2025

Web Developer Intern

Acmegrade

May 2025 - July 2025

Intern

ISSA - DRDO

(Institute for Systems Studies & Analyses, Defence Research and Development Organisation)

PROJECTS

- **Liftsy – AI-Powered Fitness Social Platform** | **MERN, Groq AI, JWT, REST APIs**
  - Built a full-stack fitness tracking and social platform with JWT authentication, real-time workout session logging, workout sharing, leaderboards, and athlete discovery.
  - Integrated Groq AI APIs for personalized workout generation, post-session analysis, and a real-time AI fitness coaching chatbot with persistent conversation history.
  - Designed MongoDB schemas and developed RESTful APIs for social feed features including reactions, comments, follow system, live updates, and analytics dashboards.

- **Klutch – Full-Stack Multi-Vendor E-Commerce Platform** | **MERN, JWT, REST APIs**
  - Built a production-ready multi-vendor e-commerce platform using the MERN stack with role-based authentication for Admin, Vendor, and Customer.
  - Implemented JWT authentication, protected routes, vendor-specific product ownership, cart and order management, review/rating system, and return/replacement workflows.
  - Designed and integrated RESTful APIs with MongoDB Atlas for secure authorization, scalable data persistence, and efficient query handling.

EXTRACURRICULARS

- Completed Samsung Innovation Campus (SIC) course in Artificial Intelligence, including hands-on project development and technical presentations.
- Core Committee Member of PAJAV – the official IT society of MAIT, and ElevateHub Society
- Participated in multiple Competitions and Hackathons
