ABOUT ME

Information Technology undergraduate with experience in Software Engineering, Full-Stack Development, Data Structures & Algorithms, and Applied AI. Skilled in developing secure, scalable, and high-quality software solutions, applying analytical problem-solving, writing efficient code, and leveraging modern technologies.

EDUCATION

B.Tech in Information Technology | Maharaja Agrasen Institute of Technology | 2023 - 2027 | **CGPA: 9.26**

Class XII – CBSE | Greenway Modern School | **87.80%** | 2023

Class X – CBSE | Greenway Modern School | **94.00%** | 2021

SKILLS

- **Programming Languages:** C++, Python, Java, C, JavaScript
- **Core Computer Science:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **Frontend:** HTML, CSS, JavaScript, React.js, Tailwind CSS, Recharts
- **Backend & APIs:** Node.js, Express.js, FastAPI, REST APIs, Flask, JWT Authentication, Axios
- **Databases & SQL:** MongoDB, MySQL, Mongoose ODM
- **Machine Learning & AI:** NumPy, Pandas, Scikit-Learn, XGBoost, TensorFlow, NLP, RAG, FAISS, PyTorch, OpenCV, Groq AI
- **Developer Tools & Platforms:** Git, GitHub, VS Code, MongoDB Atlas, Docker, Postman, Render, Vercel, Google Colab

INTERNSHIPS

July 2026 - Present | **Software Engineer Intern** | **GlobalLogic**

May 2025 - July 2025 | **Summer Research Intern** | **ISSA - DRDO** (Defence Research and Development Organisation)

Jan 2025 - Mar 2025 | **Web Developer Intern** | **Acmegrade**

PROJECTS

BusinessPulse – Business Analytics & Forecasting Platform | **React, FastAPI, Python, MongoDB, Scikit-Learn, JWT**

- Developed a full-stack business analytics and forecasting platform with interactive dashboards for historical trends, KPIs, performance analysis, customer insights, and ML-based forecasting using React, FastAPI, MongoDB, and Scikit-Learn.
- Engineered a custom dataset pipeline supporting CSV upload, validation, preview, column mapping, and normalization, enabling user datasets to power analytics, forecasting, data quality checks, and automated business insights.
- Applied SOLID principles through a layered Route–Service–Repository architecture with JWT authentication, password hashing, protected APIs, Pydantic validation, Swagger documentation, and Axios-based token authorization.

FitTrack – AI Fitness Tracker with RAG-Powered Coach | **Python, FastAPI, Scikit-Learn, XGBoost, FAISS, React, MongoDB**

- Built a full-stack AI fitness platform with a microservice architecture (FastAPI + Express.js), integrating 4 ML models for weight, fat-loss, muscle-gain prediction and injury-risk classification, with modular, SOLID-based backend architecture and REST APIs.
- Developed a RAG-powered AI Coach using FAISS, Sentence Transformers & Groq LLM, grounded in a fitness knowledge base, alongside NLP-based semantic exercise recommendations and MongoDB-backed workout, nutrition, sleep, body-metrics tracking and analytics.

Liftsy – Full-Stack AI-Powered Fitness Social Platform | **MERN, Groq AI, JWT, REST APIs**

- Developed an AI-powered full-stack fitness platform with JWT authentication, workout management, live session tracking, progress analytics, athlete discovery, and social interactions, providing a centralized platform for personalized fitness management.
- Integrated Groq AI for personalized workout generation, fitness coaching, session analysis, & progressive-overload recommendations; implemented real-time social interactions and notifications using Socket.IO with MongoDB-backed data management.
- Engineered an end-to-end training workflow with real-time set tracking, session analytics, personal-record detection, progress visualization, and interactive social features.

CERTIFICATIONS & CREDENTIALS

- Samsung Innovation Campus – Artificial Intelligence | Samsung
- AWS Academy Generative AI Foundations | AWS Academy
- AWS Knowledge: Cloud Essentials | Amazon Web Services

EXTRACURRICULARS

- Core Committee Member, PAJAV (MAIT's IT Society) and ElevatHub; contributed to technical initiatives, event coordination, and community outreach; participated in and secured wins at hackathons and technical competitions.
